

# United for our future

## PARTNERSHIP

Our forests have an exceptional power to reduce effects of global warming.

Protect them is a strong commitment for the hotel for 3 years, in partnership with the National Forest Office (ONF) and the "Région Sud".

Thanks to your generous donations, 1 200 trees have been planted in the domaniale forest in the Var in the south of France.

This year, we invite you to joins us to protect an other emblematic mediterranean forest, the "massif de L'Esterel".

You can make a donation at the reception during your stay.

## MASSIF DE L'ESTEREL - CAP DU DRAMONT

The Esterel Forest is unique and famous for its beautiful landscapes. The red rock gives to the forest a special charm.

Among all the place in the Esterel, the "Cap du Dramont", is the place which needs to be preserved. The ONF leads many works to understand the biodiversity. It discovered lot of tropical plants harmful for the mediterranean plants.

Many works are necessary to restrict these tropical plants and guarantee a future for the forest.
